CLASS ROLL,
OR
DAILY REGISTER
OF
STUDIES IN CLASSES ;
FOR SCHOOLS OF EVERY GRADE :
BY AMOS ROW.

26.6
[ENTERED ACCORDING TO ACT OF CONGRESS.]

LANCASTER, PA.
1857.

This aid to the practical Teacher requires no preface. Every one who has attempted correct classification knows, from his own experience, the want of proper class rolls ; and though many may be capable of preparing their own, yet the labor of so doing and the difficulty of procuring blank books properly ruled for the purpose are serious obstacles. The object of the one now presented is to remedy this difficulty, and to save time and labor, as well as to effect a uniformity in registering class operations. Whether it will accomplish this object can only be determined by trial ; and that it may be fairly tried, the following explanatory remarks are offered :—

The name of the class study is to be written at the top of each of the two opposite pages, devoted to it, as "GRAMMAR," &c. On the second line of the heading and running across both pages, are to be written the number or title designating the particular class in the study, the period embraced, and the name of the Teacher. In the first column under the heading are to be written the numbers, and in the second the names of the members of the class. Over the small columns separated by single lines are to be entered the actual teaching days designated by the proper days of the month ; and over the two columns enclosed by double lines, the words "average" and "conduct." The two columns at *the end of each month* are for monthly averages and over the first is to be written, M. A. S. (Monthly Average of Studies,) and over the second, M. A. C. (Monthly Average of Conduct.)

CHARACTERS:—1, denotes the highest mark of merit ; 5, the lowest ; a, absent ; e, excused ; p, promoted. The weekly average is obtained by dividing the sum of the merit marks, during the week, by the number of actual recitations ; and the monthly average by dividing the sum of the weekly average by the number of weeks. Marks for conduct are only to be entered weekly, but to be averaged monthly. The date when the pupil enters or leaves class is shown by the first and last merit marks opposite his name.

The large column at the right hand side of the second page is intended for remarks by the Teacher. Each page is designed to last one month ; and when the classes are small, two or more may be registered on the same page.

These explanations will be better understood by referring to the model sheet on the last page of the book.
